COMMENTS

Personnel reductions and fiscal cutbacks have mandated that changes in format and frequency of circulation be made. Published data will be for the last month of the quarter for the time being. In the mean time, on-going monthly data are being compiled and stored in the Research Office as usual.

I. AFDC PROGRAM

The tables in this section are a report on the status of the AFDC program on the last pay period of each month, therefore, this is a "point-in-time" report rather than a report on the actual experience in any given month. It will thus differ from the official fiscal office reports. It is useful only for trend data. AFDC Table I will show the current month caseloads broken down into Regular and Unemployed, and total cases for the preceding month and for the same month in the previous year.

II. GENERAL PUBLIC ASSISTANCE PROGRAM

As the name implies, this is the "catch all" program for clients who are not eligible for other programs. It is 100% state financed. GPA payments are made weekly, thus these monthly reports sometimes cover four weeks, sometimes five.

The first table covers every single payment made to every single GPA client for whatever reason.

The second table covers payments made for medical needs for GPA clients. These same clients may also be receiving payments for their maintenance needs. Figures in GPA Table II are also included in GPA Table I.

Table III covers medical payments for cases which in that particular month did not receive any other kind of payment. These may be cases whose only need was for medical in that month, or they may be medical bills paid for a case which was on the regular GPA assistance program at the time a medical expense was incurred but whose case was closed before the bill was paid. Figures in this table are also included in GPA Table I and GPA Table II.

III. MISCELLANEOUS TABLES

The first table, Medicaid Eligibles, is for those persons whose only need is for medical and who meet the category requirements for the federal Medicaid program. This does not include the people in the GPA medically needy program, nor does it include some aged, blind and disabled people in nursing homes or intermediate care facilities, nor some categorically needy persons in the community not receiving a money payment.

The second miscellaneous table, Food Stamps, covers all of those people who were authorized to receive food stamps. Please note this does not mean all of those who actually used food stamps.

Table III is for the persons receiving Supplemental Social Security Income. The designations by city and town in this table must be considered as estimated. Our reporting on this does not give us a city/town code, so we must work with zip codes in order to get city/town data. This is complicated in Rhode Island by the fact that some zip codes overlap city/town boundries.

If any further information or clarification is needed about any of the figures in these tables, please feel free to contact the Research Office of the Rhode Island State Department of Social and Rehabilitative Services, either by mail at the address indicated on the cover or by telephone (401-464-2305).

RESEARCH AND STATISTICS
December 20, 1983

COMMENTS

Personnel reductions and fiscal cutbacks have mandated that changes in format and frequency of circulation be made. Published data will be for the last month of the quarter for the time being. In the mean time, on-going monthly data are being compiled and stored in the Research Office as usual.

I. AFDC PROGRAM

The tables in this section are a report on the status of the AFDC program on the last pay period of each month, therefore, this is a "point-in-time" report rather than a report on the actual experience in any given month. It will thus differ from the official fiscal office reports. It is useful only for trend data. AFDC Table I will show the current month caseloads broken down into Regular and Unemployed, and total cases for the preceding month and for the same month in the previous year.

II. GENERAL PUBLIC ASSISTANCE PROGRAM

As the name implies, this is the "catch all" program for clients who are not eligible for other programs. It is 100% state financed. GPA payments are made weekly, thus these monthly reports sometimes cover four weeks, sometimes five.

The first table covers every single payment made to every single GPA client for whatever reason.

The second table covers payments made for medical needs for GPA clients. These same clients may also be receiving payments for their maintenance needs. Figures in GPA Table II are also included in GPA Table I.

Table III covers medical payments for cases which in that particular month did not receive any other kind of payment. These may be cases whose only need was for medical in that month, or they may be medical bills paid for a case which was on the regular GPA assistance program at the time a medical expense was incurred but whose case was closed before the bill was paid. Figures in this table are also included in GPA Table I and GPA Table II.

III. MISCELLANEOUS TABLES

The first table, Medicaid Eligibles, is for those persons whose only need is for medical and who meet the category requirements for the federal Medicaid program. This does not include the people in the GPA medically needy program, nor does it include some aged, blind and disabled people in nursing homes or intermediate care facilities, nor some categorically needy persons in the community not receiving a money payment.

The second miscellaneous table, Food Stamps, covers all of those people who were authorized to receive food stamps. Please note this does not mean all of those who actually used food stamps.

Table III is for the persons receiving Supplemental Social Security Income. The designations by city and town in this table must be considered as estimated. Our reporting on this does not give us a city/town code, so we must work with zip codes in order to get city/town data. This is complicated in Rhode Island by the fact that some zip codes overlap city/town boundries.

If any further information or clarification is needed about any of the figures in these tables, please feel free to contact the Research Office of the Rhode Island State Department of Social and Rehabilitative Services, either by mail at the address indicated on the cover or by telephone (401-464-2305).

RESEARCH AND STATISTICS
March 20, 1984

COMMENTS

Personnel reductions and fiscal cutbacks have mandated that changes in format and frequency of circulation be made. Published data will be for the last month of the quarter for the time being. In the mean time, on-going monthly data are being compiled and stored in the Research Office as usual.

I. AFDC PROGRAM

The tables in this section are a report on the status of the AFDC program on the last pay period of each month, therefore, this is a "point-in-time" report rather than a report on the actual experience in any given month. It will thus differ from the official fiscal office reports. It is useful only for trend data. AFDC Table I will show the current month caseloads broken down into Regular and Unemployed, and total cases for the preceding month and for the same month in the previous year.

II. GENERAL PUBLIC ASSISTANCE PROGRAM

As the name implies, this is the "catch all" program for clients who are not eligible for other programs. It is 100% state financed. GPA payments are made weekly, thus these monthly reports sometimes cover four weeks, sometimes five.

The first table covers every single payment made to every single GPA client for whatever reason.

The second table covers payments made for medical needs for GPA clients. These same clients may also be receiving payments for their maintenance needs. Figures in GPA Table II are also included in GPA Table I.

Table III covers medical payments for cases which in that particular month did not receive any other kind of payment. These may be cases whose only need was for medical in that month, or they may be medical bills paid for a case which was on the regular GPA assistance program at the time a medical expense was incurred but whose case was closed before the bill was paid. Figures in this table are also included in GPA Table I and GPA Table II.

III. MISCELLANEOUS TABLES

The first table, Medicaid Eligibles, is for those persons whose only need is for medical and who meet the category requirements for the federal Medicaid program. This does not include the people in the GPA medically needy program, nor does it include some aged, blind and disabled people in nursing homes or intermediate care facilities, nor some categorically needy persons in the community not receiving a money payment.

The second miscellaneous table, Food Stamps, covers all of those people who were authorized to receive food stamps. Please note this does not mean all of those who actually used food stamps.

Table III is for the persons receiving Supplemental Social Security Income. The designations by city and town in this table must be considered as estimated. Our reporting on this does not give us a city/town code, so we must work with zip codes in order to get city/town data. This is complicated in Rhode Island by the fact that some zip codes overlap city/town boundries.

If any further information or clarification is needed about any of the figures in these tables, please feel free to contact the Research Office of the Rhode Island State Department of Social and Rehabilitative Services, either by mail at the address indicated on the cover or by telephone (401-464-2305).

RESEARCH AND STATISTICS
July, 1984

COMMENTS

Personnel reductions and fiscal cutbacks have mandated that changes in format and frequency of circulation be made. Published data will be for the last month of the quarter for the time being. In the mean time, on-going monthly data are being compiled and stored in the Research Office as usual.

I. AFDC PROGRAM

The tables in this section are a report on the status of the AFDC program on the last pay period of each month, therefore, this is a "point-in-time" report rather than a report on the actual experience in any given month. It will thus differ from the official fiscal office reports. It is useful only for trend data. AFDC Table I will show the current — month caseloads broken down into Regular and Unemployed, and total cases for the preceding month and for the same month in the previous year.

II. GENERAL PUBLIC ASSISTANCE PROGRAM

As the name implies, this is the "catch all" program for clients who are not eligible for other programs. It is 100% state financed. GPA payments are made weekly, thus these monthly reports sometimes cover four weeks, sometimes five.

The first table covers every single payment made to every single GPA client for whatever reason.

The second table covers payments made for medical needs for GPA clients. These same clients may also be receiving payments for their maintenance needs. Figures in GPA Table II are also included in GPA Table I.

Table III covers medical payments for cases which in that particular month did not receive any other kind of payment. These may be cases whose only need was for medical in that month, or they may be medical bills paid for a case which was on the regular GPA assistance program at the time a medical expense was incurred but whose case was closed before the bill was paid. Figures in this table are also included in GPA Table I and GPA Table II.

III. MISCELLANEOUS TABLES

The first table, Medicaid Eligibles, is for those persons whose only need is for medical and who meet the category requirements for the federal Medicaid program. This does not include the people in the GPA medically needy program, nor does it include some aged, blind and disabled people in nursing homes or intermediate care facilities, nor some categorically needy persons in the community not receiving a money payment.

The second miscellaneous table, Food Stamps, covers all of those people who were authorized to receive food stamps. Please note this does not mean all of those who actually used food stamps.

Table III is for the persons receiving Supplemental Social Security Income. The designations by city and town in this table must be considered as estimated. Our reporting on this does not give us a city/town code, so we must work with zip codes in order to get city/town data. This is complicated in Rhode Island by the fact that some zip codes overlap city/town boundries.

If any further information or clarification is needed about any of the figures in these tables, please feel free to contact the Research Office of the Rhode Island State Department of Social and Rehabilitative Services, either by mail at the address indicated on the cover or by telephone (401-464-2305).

RESEARCH AND STATISTICS
October, 1984

COMMENTS

Personnel reductions and fiscal cutbacks have mandated that changes in format and frequency of circulation be made. Published data will be for the last month of the quarter for the time being. In the mean time, on-going monthly data are being compiled and stored in the Research Office as usual.

I. AFDC PROGRAM

The tables in this section are a report on the status of the AFDC program on the last pay period of each month, therefore, this is a "point-in-time" report rather than a report on the actual experience in any given month. It will thus differ from the official fiscal office reports. It is useful only for trend data. AFDC Table I will show the current month caseloads broken down into Regular and Unemployed, and total cases for the preceding month and for the same month in the previous year.

II. GENERAL PUBLIC ASSISTANCE PROGRAM

As the name implies, this is the "catch all" program for clients who are not eligible for other programs. It is 100% state financed. GPA payments are made weekly, thus these monthly reports sometimes cover four weeks, sometimes five.

The first table covers every single payment made to every single GPA client for whatever reason.

The second table covers payments made for medical needs for GPA clients. These same clients may also be receiving payments for their maintenance needs. Figures in GPA Table II are also included in GPA Table I.

Table III covers medical payments for cases which in that particular month did not receive any other kind of payment. These may be cases whose only need was for medical in that month, or they may be medical bills paid for a case which was on the regular GPA assistance program at the time a medical expense was incurred but whose case was closed before the bill was paid. Figures in this table are also included in GPA Table I and GPA Table II.

III. MISCELLANEOUS TABLES

The first table, Medicaid Eligibles, is for those persons whose only need is for medical and who meet the category requirements for the federal Medicaid program. This does not include the people in the GPA medically needy program, nor does it include some aged, blind and disabled people in nursing homes or intermediate care facilities, nor some categorically needy persons in the community not receiving a money payment.

The second miscellaneous table, Food Stamps, covers all of those people who were authorized to receive food stamps. Please note this does not mean all of those who actually used food stamps.

Table III is for the persons receiving Supplemental Social Security Income. The designations by city and town in this table must be considered as estimated. Our reporting on this does not give us a city/town code, so we must work with zip codes in order to get city/town data. This is complicated in Rhode Island by the fact that some zip codes overlap city/town boundries.

If any further information or clarification is needed about any of the figures in these tables, please feel free to contact the Research Office of the Rhode Island State Department of Social and Rehabilitative Services, either by mail at the address indicated on the cover or by telephone (401-464-2305).
